YOUR 5-POINT CYBER RISK ASSESSMENT CHECKLIST
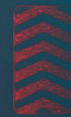

Don't wait for a cyberattack to expose your vulnerabilities. Be proactive and use this 5-point checklist to evaluate and strengthen your cybersecurity posture.

1

IDENTIFY WEAKNESSES
Find the gaps and potential threats in your IT landscape that could compromise your business.

2

ANALYZE RISKS
Evaluate the impact of potential risks on your business operations.

3

PRIORITIZE RISKS
Fix the most critical issues first.

4

TAKE ACTION
Implement a comprehensive mitigation strategy to strengthen your defenses.

5

REVIEW & MONITOR
Regularly check for new threats and improvise your strategy accordingly.
